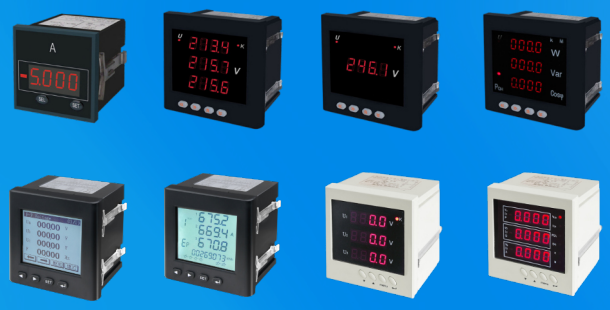
DIGTAL PANEL METER



Introduction

Blue Jay digital panel meter is a digital alternative to analog display instrument,which has lower cost for installation and can make full use of panel space. It is suitable for indication and monitoring of single-phase or three-phase circuits,accepts various inputs (such as voltage,current,frequency,etc.),provides alarm relay, analog signal transmission and optional pulse output.

We supply high-quality,high-precision BPM series standard digital panel meters and APM series multi-function digital panel meters, which can be used to measure various electrical parameters, including voltage,current,frenquency, etc. The large LCD screen helps you easily read the digital results displayed on it.
